Program: DuctConnect v.1.0
By: Andrea Andreetti
Date: November 2008

### What is DuctConnect ? (Duct Connection)

DuctConnect allows the user to draw in 2 clicks a HVAC double line side take off.

How does it work ?

Load DuctConnect lisp file from the AutoCAD "_appload" command.
Run DuctConnect and select a ductwork line. DuctConnect will ask to choose between round or square ductwork type. Once the choice is made, Enter the duct size(width), then move your mouse to enable the dynamic real time design.

Note : the selected point will be represented by an yellow asterix and determine the airflow direction.

Enjoy !
