Program: Taper v.1.0
By: Andrea Andreetti
Date: October 2008

What is TAPER ?
TAPER allows you to create a transition beween 2 conduit size.

How does it work ?
-Load the TAPER.lsp file with the autoCAD "_appload" command.
-You will have these command available. :

TAPER : Will draw a simple double line transition conduit.

R2S : Will draw Round to Square transition conduit.

S2R : Will draw Square to Round transition conduit.

R2R : Will draw Rond to Rond transition confuit.

During the process, you can move your mouse to change the transition offset
(Center, right or left way)

Use mouse right-click or left-click to accept the transition lines.

Enjoy !
