Program: DuctAttach v.1.0
By: Andrea Andreetti
Date: November 2008

What is DuctAttach ?

DuctAttach allows to user to extend 2 lines representing a HVAC conduit to another line and create a take off section.
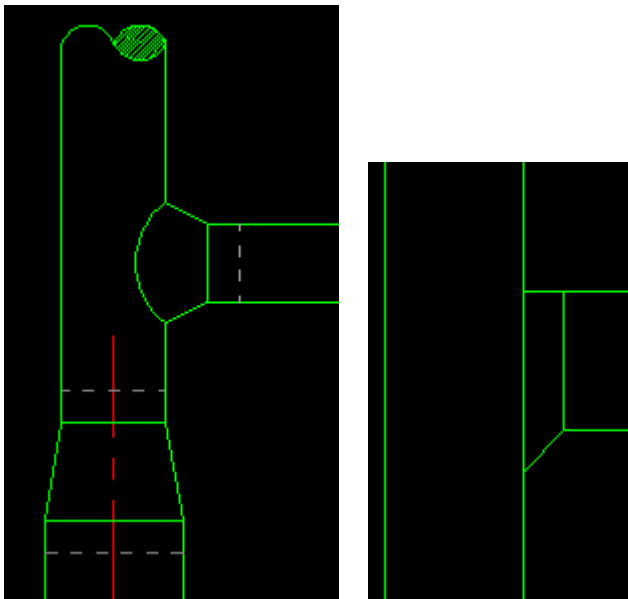

How does it work ?

Load DuctAttach lisp file from the AutoCAD "_appload" command.
Run DuctAttach and select 2 paralelle lines representing a ductwork line.
You will see DuctAttach drawing a preview of the result simply by moving the mouse.
Hit TAB key to switch attach method.

Note : By moving the mouse will switch the fluide direction take-off.

Enjoy !
